Exercise 13.1: A Gerrit Walk through

Since we do not have a **Gerrit** server set up, it is not easy to do an exercise demonstrating its capabilities.

The project, however, has a great walk through example at https://gerrit-review.googlesource.com/Documentation/intro-gerrit-walkthrough.html which demonstrates step by step how to:

- Making a change
- Creating the review
- Reviewing the change
- Reworking the change
- Verifying the change
- Submitting the change.

Please read this example thoroughly.
