Exercise 6.1: TODO Case Studies

The best way to learn about how companies have successully incorporated OSS into their DNA is to read some the case studies we listed previously.

You will notice the companies range from those built on and around OSS (like **Red Hat**) to those in other industries, such as **Capital One** in the financial sector, **Comcast** in telecommunications and entertainment, and general business producsts, such as **SAP** and **Salesforce**.

Pick whatever interests you and learn about those experiences.
